

The unemployment rate saw little improvement in the Appalachian Region in 2010, after reaching its highest level in decades early in the year. The labor force continues to struggle, as a disproportionate share of the Appalachian workforce gave up the search for jobs and left the labor force altogether.

The rate of job loss during this recession has been more severe in Appalachia than in the nation as a whole: -2.0% in Appalachia vs. -1.7% for the nation between 2007Q4 and 2010Q4. Job loss was most severe in North Central and Southern Appalachia, where the decline was -2.7 and -2.6% respectively over this period; and least severe in Central Appalachia, where employment fell just -0.8%.

While the nation's economy lost 8 million jobs (not seasonally adjusted) from 2007Q4 to 2009Q4 and employment fell back to 2004 levels, Appalachia lost roughly 700,000 jobs, representing all of the jobs gained since 2000. Of the 420 counties in Appalachia, only 35 registered positive employment growth during this recession.

Unemployment trends in Appalachia closely tracked the nation during the recession and the previous expansion, averaging 9.7% in 2010, up from 4.7% at the 2007 peak. Roughly two-thirds of Appalachia's (275 of 420) counties have higher unemployment rates than the nation as a whole.

During the previous expansion, labor force growth was slower in Appalachia than the nation, 0.7% and 1.1% respectively. During the recession the Appalachian labor force contracted more: -0.4% compared to -0.1% for the nation. The labor force declined -0.8% in Southern Appalachia and -1.0% in North-Central Appalachia. More than 200,000 Appalachian workers gave up the search for jobs and left the labor force between 2008Q4 and 2010Q4. These discouraged workers are not counted in the unemployment data.

Population growth between 2000 and 2010 was lower in Appalachia than in the nation as a whole, 6.8% vs. 9.7% respectively, but again it varied widely among different parts of the Region. Population in Northern Appalachia declined -0.8% over the period, but boomed in Southern Appalachia, where it increased 16.6%.

The ratio of employment to population, a rough measure of labor force participation, was more than 2% lower in Appalachia than in the nation as a whole (.428 and .450 respectively). The employment-population ratio varied from a low of .38 in the Central subregion to a high of .45 in the Northern subregion.

Some areas of Appalachia have been harder hit than others in this recession. Employment declined by more than the national average in Appalachian Alabama (-2.9%), Georgia (-2.8%), Maryland (-2.3%), Mississippi (-1.8%), New York (-1.8%), North Carolina (-3.0%), Ohio (-1.8%), and West Virginia (-3.3%). Employment did not decline as severely as the nation in the Appalachian portion of Kentucky, Pennsylvania, South Carolina, Tennessee, and Virginia.

Unemployment exceeded the national average in 2010 in the Appalachian portion of Georgia (9.9%), Kentucky (11.5%), Maryland (9.6%), Mississippi (12.5%), North Carolina (10.7%), Ohio (11.5%), and South Carolina (10.6%). Unemployment rates were lower than the national average in the Appalachian portion of Alabama, New York, Pennsylvania, Tennessee, Virginia, and West Virginia.

Recession has hit harder in Appalachia
