Administered
350 Days a Year

500 Adult
Respondents

DIABETES ACROSS AMERICA & APPALACHIA

National Average	11.1%
Alabama	16.9%
Georgia	11.8%
Kentucky	13.9%
Maryland	11.6%
Mississippi	16.6%
New York	10.6%
North Carolina	13.2%
Ohio	13.0%
Pennsylvania	11.1%
South Carolina	13.9%
Tennessee	14.5%
Virginia	11.8%
West Virginia	16%

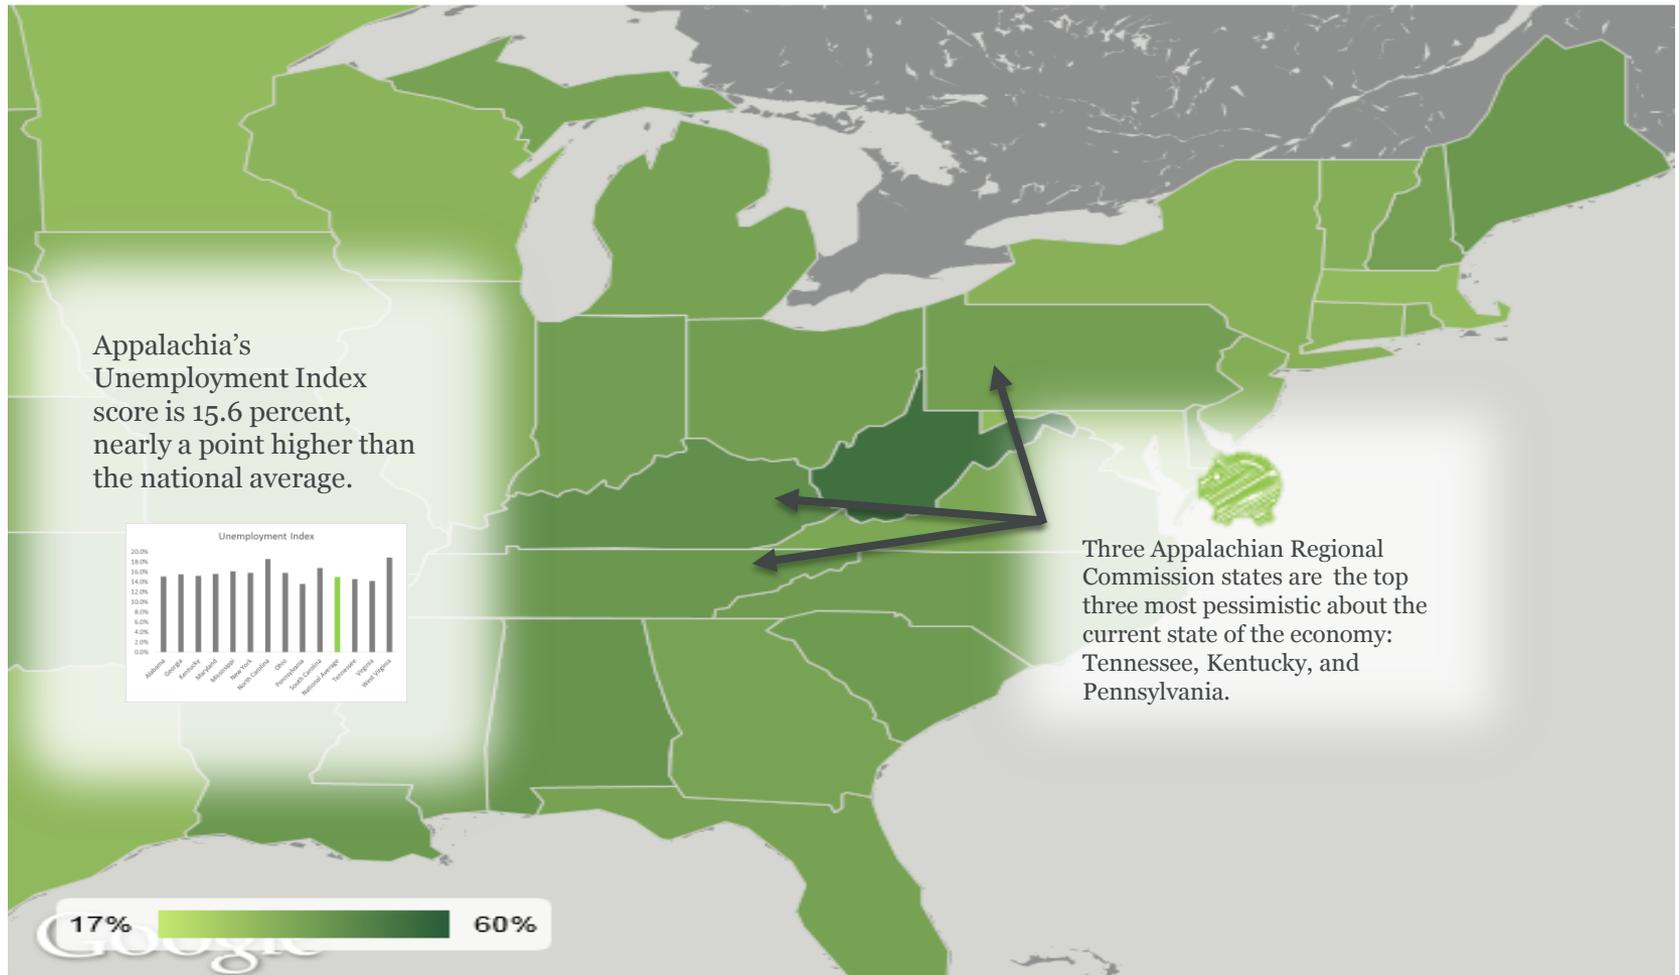

Percentage of state residents who say a physician or nurse told them they have diabetes

All Appalachian states rank in the top half of the United States for percentage of population with diabetes.

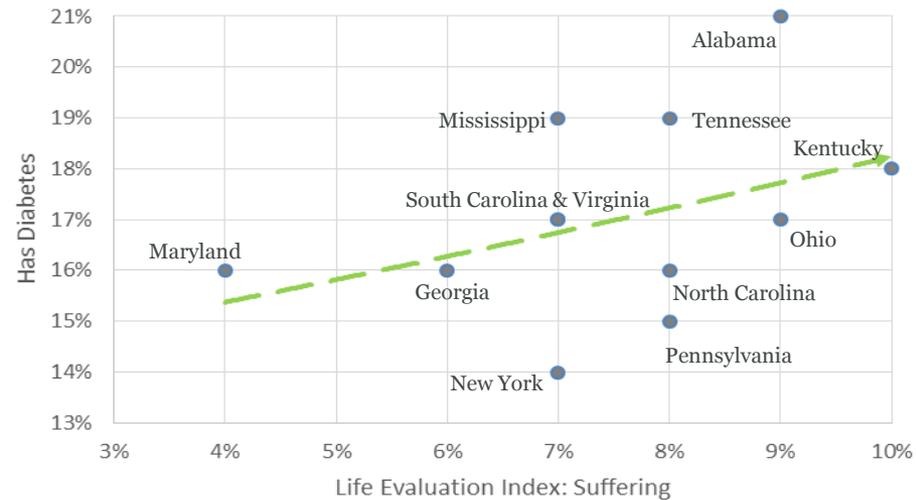

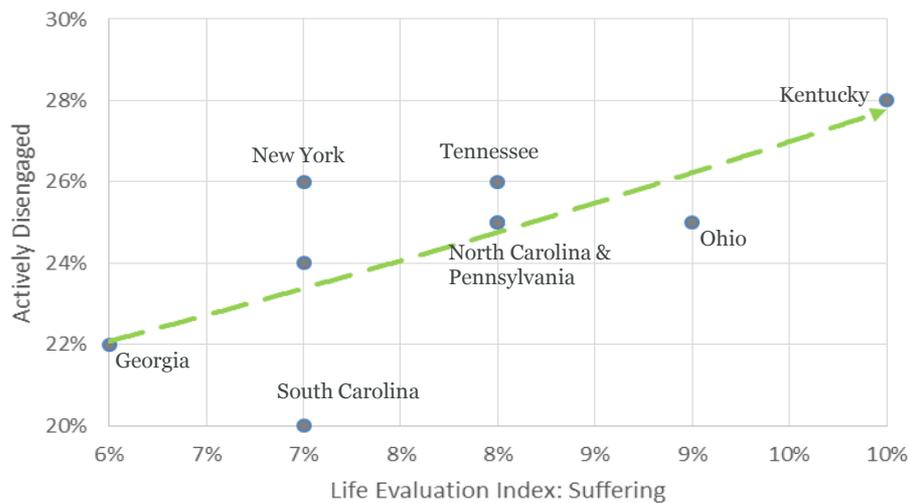

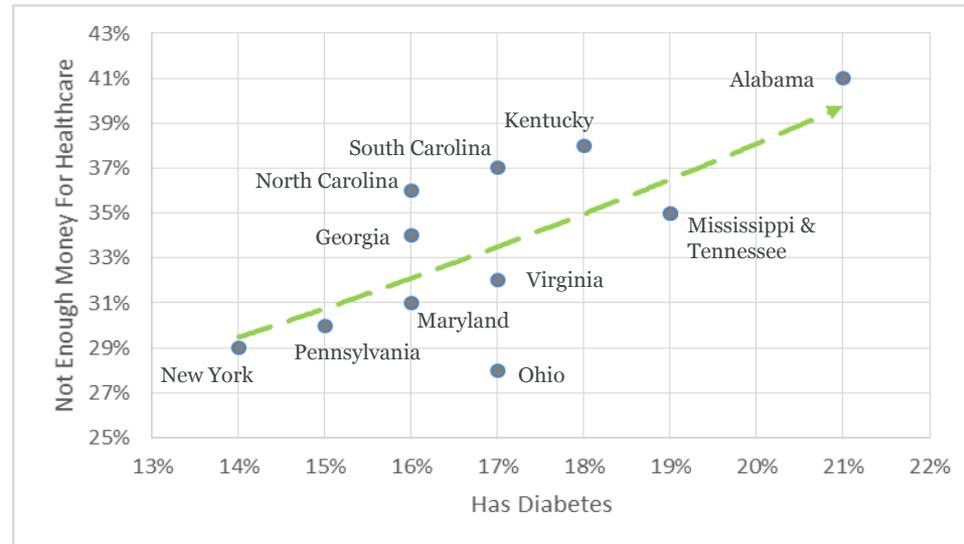

APPALACHIA'S ECONOMIC HARDSHIPS

Economic Conditions-United States: 36% (2014) Poor

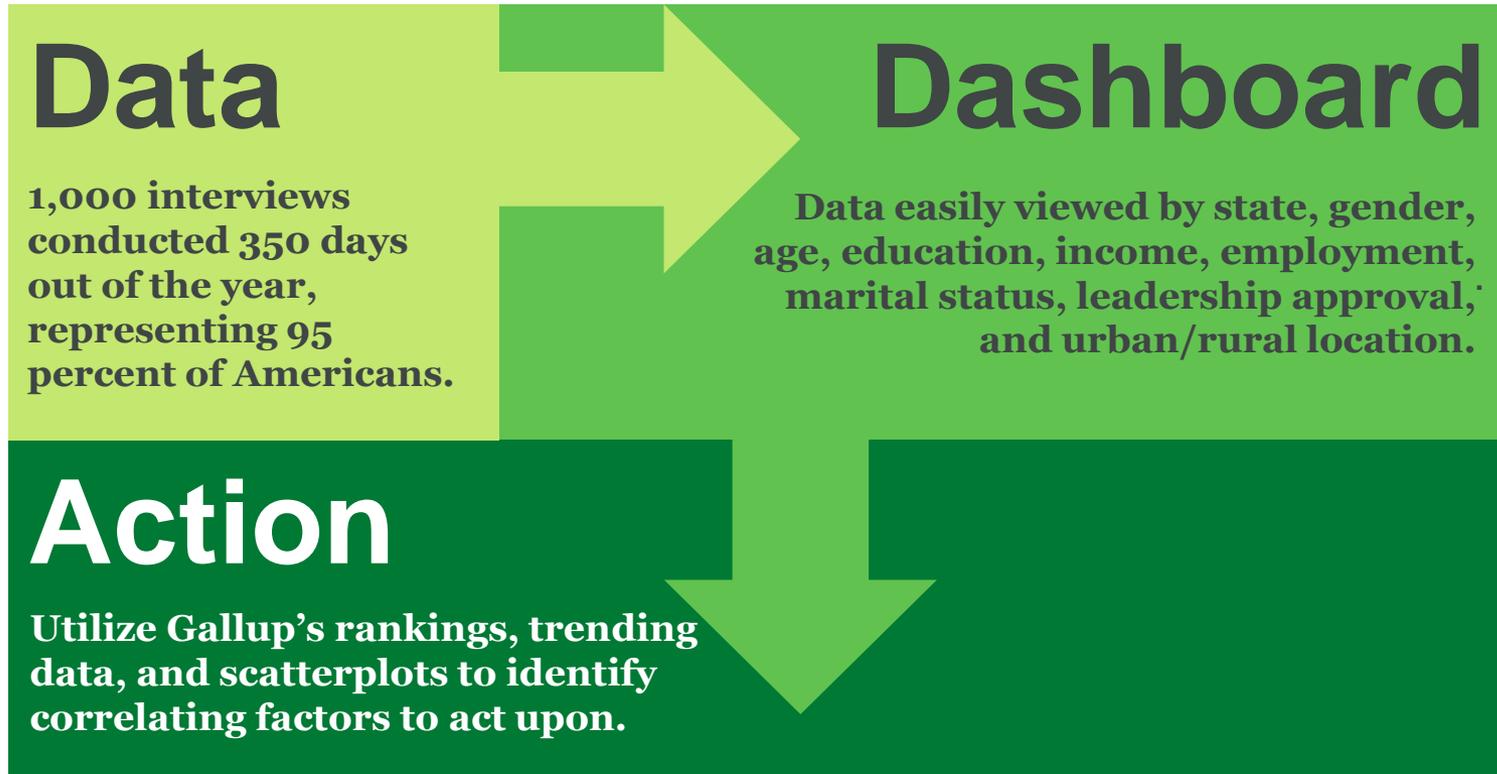

GALLUP ANALYTICS' INSIGHTS ON THE ISSUES

- Positive correlations exist between being financially unable to obtain healthcare, and percentage of the target population with diabetes. A positive correlation exists as well between an individual categorizing their life perception as “suffering” and having diabetes.
- This trend also exists between an employee’s active disengagement in the work place and their life perception as “suffering.”
- Gallup’s research has shown that leadership should prioritize on quality jobs and careers, allowing the people of Appalachia to achieve higher levels of purpose well-being.
