Appalachian Region Income Report- 2011

Source: Bureau of Economic Analysis, Regional Economic Information System
Current dollars are adjusted for inflation using the PCE chained price index, base year=2005

Per capita market income was 25% lower in Appalachia than in the nation as a whole in 2009, at $22,491 and $29,945 respectively. In Appalachia, per capita personal income was 82% of the national average, average proprietor's income was 73% of the nation, and per capita investment income was only 70% of the national average. All types of income declined significantly between 2007 and 2009 in both the nation and in Appalachia, but that was especially true for market income. Average proprietors' incomes also dropped considerably from 2007 to 2009 in Appalachia and the nation (-12.7% and -11.4%, respectively).

All five Appalachian subregions had significantly lower per capita incomes than the nation as a whole. Per capita incomes tend to be relatively higher in Northern and Southern Appalachia and lowest in Central Appalachia. In Central Appalachia, per capita personal income was only 68% of the national average in 2009, and per capita market income (personal income less transfer payments) was just $15,964, nearly half the national average.

State trends reveal large disparities between Appalachia and the nation. Per capita personal and market incomes are lower in the Appalachian portion of every state except Alabama. Per capita market income is less than 75% of the national average in the Appalachian portion of Kentucky, Mississippi, New York, North Carolina, Ohio, Tennessee, Virginia, and West Virginia. Per capita market income was only 51% of the national average in Appalachian Kentucky, and in Appalachian Mississippi, it was 59% of the nation. Real wages and salaries are less than 75% of the national average in Appalachian Kentucky, Mississippi, Ohio, and Virginia. Per capita market income declined from 2007 to 2009 in the Appalachian portion of every state except West Virginia.

Disparities in average proprietors' income (includes both farm and nonfarm proprietors) were even greater. Average proprietor's income was 51% of the national average in Central Appalachia in 2009, and in South Central and Southern Appalachia, it was 68% and 69%, respectively. Proprietors' earnings were less than 75% of the U.S. average in the Appalachian portion of every state except Alabama, Pennsylvania, and West Virginia. It was 60% or less of the U.S. average in Appalachian Georgia, Kentucky, New York, North Carolina, Ohio, South Carolina, and Virginia. In Appalachian Kentucky and Virginia, proprietors' income was only 48% and 50% of the U.S. average, respectively. Proprietors' incomes dropped significantly from 2007 to 2009 in the Appalachian portion of every state.

Per capita investment income (including dividends, interest, and rent) was less than 75% of the national average in the Appalachian portion of every state except Alabama, Maryland, North Carolina, and Pennsylvania. In Appalachian Kentucky and Mississippi per capita investment income was only 41% and 54% of the U.S. average, respectively. Per capita investment income also declined from 2007 to 2009 in the Appalachian portion of almost every state.

Per capita personal transfer payments (Social Security, Medicare, Medicaid, etc.) were higher than the U.S. average in the Appalachian portion of every state except Georgia, and they increased significantly from 2007 to 2009 throughout Appalachia. Per capita transfer payments were more than 25% higher than the national average in Appalachian Kentucky, New York, Pennsylvania, and West Virginia. In Appalachian Kentucky, they were 35% higher than the U.S. average.

Per capita market income is 25% lower in Appalachia
