## Private-sector employment in Appalachian Georgia

This report provides an overview of private-sector employment in Appalachian Georgia. All data featured in the report come from [data-Fab](#), which uses a proprietary algorithm to estimate industry-specific employment values for each county in the United States. In many cases, due to data suppression issues, public datasets do not provide the level of detail required (i.e., industry-specific estimates) to perform meaningful analyses of geographies with low population or employment levels (i.e., many rural counties).

Data-Fab uses publicly available data from the U.S. Bureau of Labor Statistics—the Quarterly Census of Employment and Wages (QCEW)—and then “fills in” unknown or suppressed values. The resulting dataset, featured throughout this report, allows for industry-specific employment estimates.

Without a dataset that “fills in” these missing values, discussion surrounding county-level employment can oftentimes be limited to only high-level, broad categories such as “Manufacturing.” With data-Fab, however, 91 industries are examined—and in the case of manufacturing, 18 specific types of manufacturing are included as distinct categories (e.g., “Paper Manufacturing” and “Transportation Equipment Manufacturing”). Descriptions of each industry are available by clicking on the links in Table 6 below.

In addition to state-specific reports (such as this one), a spreadsheet is available on ARC’s website, where users can create custom data pulls that compare geographies and industries of particular interest.

Figure 1 compares **changes in total employment** levels from 2016 to 2021 across five geographies.

Appalachian Georgia saw an increase of 8.1% over the time period, which was larger than the increase experienced in the non-Appalachian portion of the state (5.3%). It was also larger than the growth experienced in the Appalachian Region (0.4%) and United States overall (1.8%).

Figure 1 – Employment change, 2016 to 2021

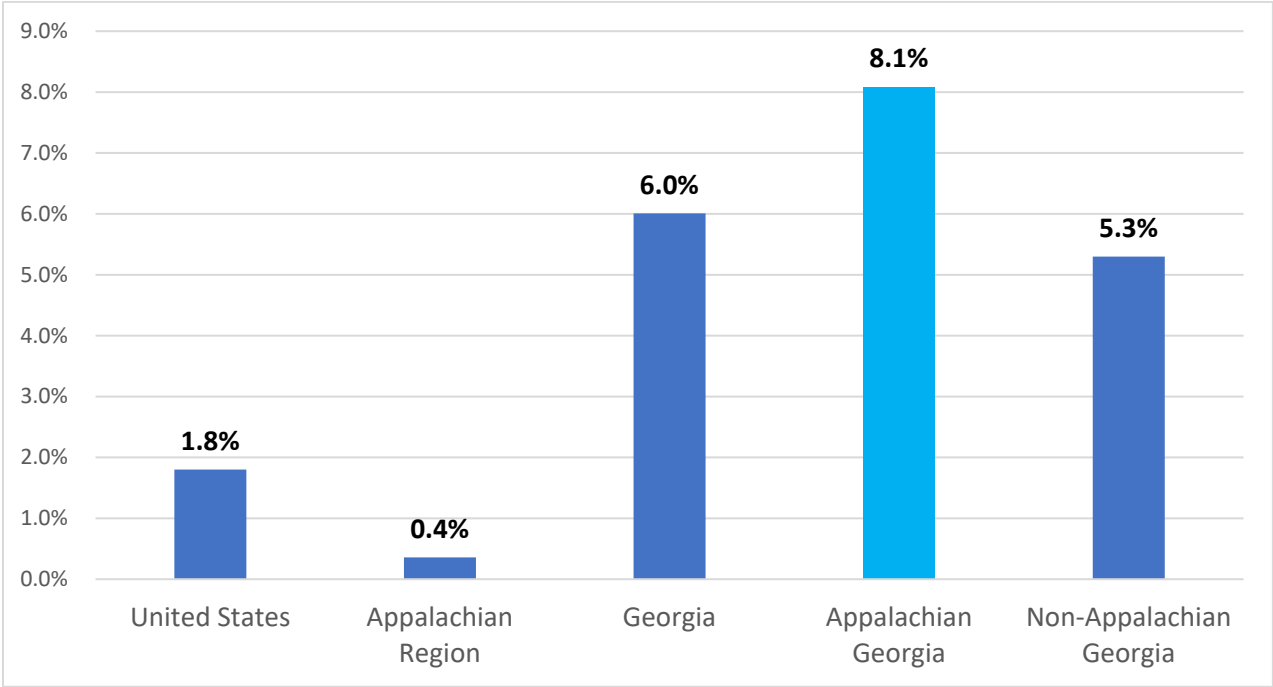

Table 1 ranks industries by **employment levels** in 2021.

Also included in the table are **industrial shares**, which represent the percentage of total employment constituted by any given industry. For example, in 2021, **Food Services and Drinking Places** accounted for 9.8% of total employment in Appalachian Georgia.

Two **employment change** variables are also included: **number** and **percent**. The aforementioned industry—**Food Services and Drinking Places**—saw a 3.6% increase in employment from 2016 to 2021, representing a gain of 3,439 jobs.

Table 2 ranks industries by **employment change**, in **absolute** terms (i.e., the number of jobs added or lost), from 2016 to 2021.

The top ten rows display the industries that had the largest *increases* over the time period. **Ambulatory Health Care Services** saw the largest growth, gaining 11,636 jobs over the five-year span.

The bottom ten rows display the industries that had the largest *decreases* over the time period. **Wholesale Electronic Markets and Agents and Brokers** saw the largest decline, losing 3,292 jobs from 2016 to 2021.

Table 3 ranks industries by **employment change**, in **relative** terms (i.e., percent change), from 2016 to 2021. Quick note: only industries that had at least a 0.5% industrial share in 2016 are included in the table; otherwise, industries with low employment numbers would dominate the table (e.g., an industry jumping from 2 to 4 employees is a 100% increase).

The top ten rows display the industries that had the largest relative *increases* over the time period. **Warehousing and Storage** saw the largest growth, going from 8,346 jobs in 2016 to 14,431 in 2021. These 6,085 added jobs represent growth of 72.9%.

The bottom ten rows display the industries that saw the largest relative *decreases* over the time period. **Telecommunications** saw the largest decline, dropping from 6,381 jobs in 2016 to 4,499 in 2021. These 1,882 lost jobs represent a decrease of 29.5%.

Table 4 ranks industries by **location quotient** in 2021. Location quotients allow us to see how specialized industries are in Appalachian Georgia relative to the United States as a whole. They are calculated by simply dividing industrial shares in Appalachian Georgia by industrial shares for the country overall.

For example, in Appalachian Georgia, there were 25.5x as many employees—in relative terms—in **Textile Product Mills** in 2021 than in the United States as a whole. (The industrial share for the industry was 2.2% in Appalachian Georgia, compared to 0.08% in the United States as a whole.)
