PROJECT SUMMARY

This project will design an implementation strategy for establishing a thriving green building supply chain hub across 114 counties and three Appalachian states. This project will further develop the products, technologies, services, and workforce pipeline to address growing industry needs.

Green Building Alliance and its partners bring a total of \$333,333 in matching funds to this project. The project will improve 113 communities/counties, 500 businesses, 100 entrepreneurs, and 1,000 workers over the 12-month performance period of the grant.
