PROJECT SUMMARY

Generation West Virginia will use ARISE funding to develop a strategic plan to train and prepare Appalachians in Pennsylvania and West Virginia for jobs in broadband fiber deployment. Impacting 61 counties, the plan's development will include partner coordination, asset mapping, industry outreach, program development, and alignment with broadband expansion plans and regional goals.

Generation West Virginia and partners bring a combined \$33,000 of matching funds to this project, which will result in one strategic plan by the end of the one-year performance period.
