PROJECT SUMMARY

Yellow Creek State Inland Port Authority will use ARISE funding to improve port infrastructure and increase capacity at two vital gateway ports on the Tennessee-Tombigbee Waterway and the Tennessee River. These ports currently provide multi-modal transfer services by way of barge, rail, and truck for multiple industrial tenants, and connect the Appalachia Region with the rest of the United States and the global marketplace. This project will impact 15 counties across Appalachian Alabama and Mississippi.

Yellow Creek State Inland Port Authority and partners bring a combined \$4,285,714 in matching funds to this project, which is expected to serve 22 businesses, lay 3,320 square feet of mooring cell renovation, and 612 linear feet of new and renovated transload dock over the two-year performance period.
